SILENT KEY

Heru Ra Walmsley,
W3WVV

October 21, 2016, at age 90

I am so sad to report the passing of Heru, W3WVV. Heru joined the BRATS in 1976 and became one of the technical directors. For years, he held the BRATS Answer men on the air, and if he did not know the answer, he found it out for the next show.... Heru Participated in many meetings with his famous exploding hot dog trick.. we will miss him dearly.... Heru was also very active in the Historical I electronics Museum....

Some Thoughts

I apologize for missing the October issue.
I have combined it with the November
Issue. We still have not heard of the date
and place of the November and December
meetings. When we do, we will announce
if on the air. Also, check the home page....

A PLAN TO TAKE SPACE WEATHER BY STORM

Hams deal with space weather regularly -- but what about everyone else? Yes, there is a plan - or there will be one soon in the U.S. Federal agencies now have until April to devise a comprehensive plan to predict, detect and deal with solar flares and other so-called space weather disturbances that could mess with the nation's technology, everything from GPS systems to satellites to the power grid itself.

President Barack Obama's Oct. 13 Executive Order directed Homeland Security, NASA, the Secretary of Defense and the Secretary of the Interior among other offices, to find ways to be alert to such occurrences, including geomagnetic storms. Obama ordered the agencies to find ways to protect or quickly repair the infrastructure, consistent with the goal identified in the nation's 2015 National Space Weather Action Plan.

The order outlines the implementation of the plan as a coordinated effort among agencies.

WA7BNM Contest Calendar

Nov. 11 -	NCCC RTTY Sprint
Nov 13-14	CW-WE Contest
Nov 19-20	ARRL EME Contest
Nov 19	RSGB 1.8MHz Contest CW
Nov 25	CQ WW DX CONTESTCW

New Business excerpts last BRATS meeting There was no October meeting

- NPTOA: KevinS, KB3PLX, will contact MarkR, W3MSR, re. Nov. outing to Ft. McHenry.
- Balloon Project: camera package is together and was demo'd. Uses RPi0 with camera. Package will include 2M APRS, 70cm telemetry, 5GHz WiFi, HiRes video.
- Hospital Involvement: Brainstormed new service can we bring to hospitals. Backup phone link via the 5GHz network? Radios in hospitals not covered by BaCo ACS, maybe with BaCi RACES / BaCi Health Dept.?
- DMR Radios: KevinS showed Tyt MD-380 and described capabilities. Interest among attendees.

Ted, WA3AER
Secretary

CANADA 150 ANNIVERSARY and LIGHTHOUSE ACTIVATION

There's nothing like a lighthouse to help illuminate a special occasion -- in this case, the 150th anniversary of Canada's confederation. We hear more from Amateur Radio Newsline's John Williams, VK4JJW.

When it turns 150 years old next year, Canada will become even more of an OM - that is, if a nation itself can be considered an OM. Amateurs however celebrate just this kind of special longevity and in that spirit, there will be an amateur radio activation of the East Point Lighthouse on Prince Edward Island which was recently named Canada's Confederation lighthouse. The lighthouse's site manager, Nova MacIsaac, told the Canadian Broadcasting Corporation that the lighthouse is the only one in the country that was built the same year as Confederation - which would be 1867 - that is still functioning as a lighthouse. That designation makes it eligible for funding to upgrade its exterior and make other improvements. Meanwhile, Prince Edward Island amateur George Dewar VY2GF is now hard at work planning an activation befitting this milestone birthday. Since that's next year, the event is going to come up fast -- like a flash of light, even.

A GREAT SIGNAL REPORT FOR THE DUKE AND DUCHESS

A visit to Canada's Yukon territory, where British royals have broken new ground -- not in construction but in communication

: It has been said that some husbands and wives eventually learn to communicate in code. Though the Duke and the Duchess of Cambridge could hardly be considered an old married couple, they have certainly embraced the "code" part -- and added a little modern touch of a Tweet.

The royals were making their first official visit to Canada's Yukon territory late last month and wished to sign the visitors' book inside the historic telegraph office of the Yukon's MacBride Museum. In this case, it was an online guest book. How could they make their presence known? They tweeted -- but in Morse Code, with the help of telegraph operator Doug Bell. At 90 years of age, the former World War II radio operator knows his way around the dots and dashes and was the perfect guide for Kate and William.

There inside the Whitehorse Telegraph Office, Doug tapped out their message on a 100-year-old key while husband and wife depressed the "send" button that dispatched the message to the Telegraph-to-Tweet Twitter account. The telegraph-to-tweet technology was developed by a Canadian company called Make IT Solutions.

The message became the online guestbook's first entry and read simply: "The Duke and Duchess of Cambridge, September 2016, Whitehorse Yukon." No translation needed there.

425 DX Bulletin

- 5H - Maurizio, IK2GZU will be active again as 5H3MB from Ilembula, Tanzania from 7 November to 2 December, while doing volunteer work for the local mission. QSL via IK2GZU (direct or bureau), LoTW and eQSL. Log search on Club Log.
- 5Z - Tom, DJ6TF and Reiner, DL7KL will be active as 5Z4/DJ6TF and 5Z4/DL7KL from Kenya on 16-30 November, CQ WW DX CW Contest included. They will be QRV on 80-10 metres. QSL via home calls. [TNX NG3K]
- PJ4 - Look for Joel PJ4/N5JR, Jim PJ4/NT5V and Jeff PJ4/K5JP to be active from Bonaire on 6-13 November. They will operate CW, SSB and RTTY on 160-10 metres. QSL via home calls, direct or bureau, and LoTW. [TNX N5JR]
-] TL - Silvano, I2YSB and the Italian DXpedition Team have announced that they will be active as TL8T from the Central African Republic in February 2017, exact dates TBA. They will operate CW and SSB on 160-10 metres, and RTTY on one band to be selected depending to propagation. QSL via I2YSB. A band & mode survey can be found on www.i2ysb.com/idt/. [TNX IK7JWY]
- V4 - Once again John, W5JON will be active as V47JA from St. Kitts (NA-104) from 15 November until 15 December. He will operate SSB on 160-6 metres. QSL via W5JON (direct only) and LoTW. [TNX NG3K]

SPECIAL EVENT STATION BOOSTS UNICEF

In another international event, radio operators in Poland have taken up the cause of starving children through a special event station that's trading QSOs for cash. Here's Newsline's John Williams, VK4JJW.

The hunger and poverty so prevalent among youngsters in southern Asia and sub-Saharan Africa is being felt now as well in the world's amateur radio community, which is raising consciousness as well as funds to help. Organized by Hams for Kids, a project of the Polish Amateur Radio Union, PZK, the project will donate 2 cents to UNICEF for every unique QSO with station SN4KIDS. Operating on the HF bands the station will continue to operate until the 13th of November. The station can also be found on 6 meters.

Amateurs have been eagerly making contact and the organizers have been reporting on their Facebook page that the number of QSOs has been growing. As of the 15th of October, they reported more than 2,000 QSOs -- and it's far from over yet.

So be listening for SN4KIDS and know that your contact translates into something more than just sending QSL cards. Hams are also sending aid. (POLISH AMATEUR RADIO UNION)

THIS MYSTERY WAS IN THE BAG

We close this week's report with this thought: As hams, we are proud to help our community, and even more proud to help fellow hams. What happens, though, when hams come to the aid of a totally different kind of ham? This story takes us to the Philippines, where Vladimir Sarmiento DW4VLS seemed on his way to becoming a hero after he'd stopped to aid a bicyclist in distress. The man had discovered a large closed garbage bag near the embankment of a creek and immediately feared the worst - that inside was the body of yet another victim of an extra-judicial killing. The stench was so bad he could barely stand it. When the cyclist flagged down Vladimir, the ham got on the radio to Alfredo Panti DU4AAP who, in turn, notified police. Authorities immediately dispatched an inspector to the site, proclaiming it a crime scene and roping it off. The long investigation began.

Four hours later, however, the investigation ended abruptly just as the municipal health officer, Dr. Elva Josen, arrived and opened the bag. Inside, the doctor found a body in the state of advanced decomposition.

The body was that of a pig.

With the story having morphed into a tale of barnyard justice gone wrong, authorities concluded this was less a case of homicide than simply.....HAMicide.
